KurzbeschreibungIn this incredible age of increasing awareness and the rise of consciousness, where the intellect is craving to find the answers to the place and purpose of ones existence, we often find ourselves at an intersection of ancient texts and modern science, falling into an array of dichotomies. Decoding the Quran is a unique interpretation, which shows the integration of the two ways, highlighting non-duality of existence, and more importantly how the human being is an integral factor of this Oneness. It employs a holistic approach to the seemingly disconnected events, laws, edicts and commands of God, integrating this miraculous knowledge, to define how and why it is a concern to humans.What is the reality of a human being?Why is mankind reminded of their reality?What does the narrations of past events mean to us in our everyday?How should we understand the metaphors of the Quran?What is awaiting us after death?The answers to these questions, along with how man should understand the One denoted by the name Allah, are the most important and prominent topics covered in the Quran Since the Quran addresses the whole of humanity throughout all ages as guidance to the truth, this particular construal has been done in the light of the realities of today.
