Years After Von Leyh I bought the A100 in November 2015 for roundabout 120 incl. the 18-70 Kit lense, because I've been a little bit tired of taking pictures only with the smartphone after times with the canon AE1. I didn't expect to much performance from this "Methusalem" but I've been very positive surprised, and I like my "old" A100 very much. End of dezember 2015 I read your "Revisited the A100" book and agree in all points. I wish a happy 2016 from Berlin, Germany and thanks a lot

Kurzbeschreibung Photographer and writer Shawn M. Tomlinson, author of the Photo Curmudgeon column and books, continues his series of books devoted to helping budding photographers get started without breaking the bank. To this end, he frequently recommends older, previously owned cameras. In this case, Tomlinson considers the first Sony DSLR, the A100. From the book: After waiting the proper mourning time for Minolta about a year Sony took the black armband off and unveiled its first DSLR, the A100. And why is this important now? Its vitally important if you are a beginning photographer and want to get a great DSLR and great lenses that wont mortgage your house. Kurzbeschreibung Photographer and writer Shawn M.
