Helpful and DiscouragingVon Donald MillerUltimately, Point Man may help many men lead their families toward safe terrain. But I had numerous problems with this book. Farrar seems to underestimate the importance of investing in daughters.

He argues that men should focus more on their sons than their daughters. He also lightly suggests that white families may follow in the destructive footsteps of African American families: with no father in the home and all. This did not seem an appropriate suggestion to me. My third problem is that the first fifty or so pages of Farrar's book (which are poorly written) are tainted with dooms-day propaganda intended to scare we men into action. I realize that this book was written many years ago, but despite Farrar's claims that the family is going to hell, and so is society, crime is now down for the eighth year in a row, abortion rates are down, teen pregnancy is down, violence and drug use are down as well. Where's the doom Steve? I am tired of Christian writers failing to be objective in their literature. I can hardly trust the Christian writer to tell me the plain truth. This book is not all bad. Farrar encourages men to take charge, lead, love, protect and strengthen the home through staying on track with God. Get off your butts, seems to be the battle cry. And so Steve's voice is important. But the writing is so poor that I can only muster up two stars for this book. By the way, every other book I have reviewed I have given five stars. I'm an easy sell. But I'm not buying this. The message is important, but the messenger is cliché.

Von ktr707@aol.com (ktr707@aol.com) when i was first given a copy of this book in 1994 i read it on the advice of a friend. it literally changed my life! i always knew being a good father was important, but didn't realize how important. i also wasn't aware how important it is to be a godly husband. i have since met steve farrar and we even further blessed. i would recommend that any man, christian or not, should read this book. you owe it to your wife, your children and yourself. i have repeatedly referenced this book for speeches and sunday school lessons for five years. farrar's other books are also wonderful. but this one, "point man" could possibly be the most important book any man can ever read besides the bible. God bless... keith reid

Von Ein Kunde Steve Farrar has touched the essence of what it takes to be a Husband and Father in his book Point Man. He steps up to men with an "in your face" look at the realities of life as a man in today's society and provides sound advice on how to stay focused as the head of the family. He doesn't shy away from telling men that they will have to make hard choices and his words dare any man to make the wrong choice by providing "real-life" examples of the impact wrong decisions by Fathers and Husbands have had on families. Point Man should be required reading for every male prior to marriage. And, as the father of three little girls, it will be required reading for all potential sons-in law.
