could never remember the title of one of my favorites, a story of a babysitter who took her charge to the Boston Common and eventually hijacked the swan boats in the park lagoon. After at least two years of asking my peers if they remembered that book (most of them did not) I decided to hunt it down with the only keyword I remembered from the title -- Terrific -- and to my delight I found it! That the book has kept with me this long proves what a great read it really is. A must for city children, but also for midwestern kids like myself looking for a window to an entirely different world.0 von 0 Kunden fanden die folgende Rezension hilfreich. Enchantment with a TwistVon Ein KundeThis book is the story of a girl named Enid, who is just like a regular kid the way kids actually are, and not the way that they are usually portrayed by adults. She and her babysitting charge (he wants to be called Terrific) go everyday to the park and meet and befriend a variety of real life people. The characters, setting, and situation are just like real life, but not so ordinary that it gets boring. Many ages would like this book, but I think the reader will appreciate it more if they are older (around 9 or 10) and have a larger view and better understanding of the way life is for different kinds of people.

KurzbeschreibungGoing to the park to broaden his horizons, fourteen-year-old babysitter Enid enjoys unexpected friendships with a bag lady and a black saxophonist.
